

Homework #2 -- Writing an Algorithm  
Due Monday 2/25/08 -- In class

Write an algorithm for tying your shoes.

Any technique that solves the problem is permitted. However, you cannot use glue, rubber bands, twist ties or any other non-traditional method. Just write the algorithm for tying your shoes.

This algorithm must be very simple and step-by-step. Think it through clearly. Assume the text will be read aloud to a highly dexterous 4-year old.
