Comment on the elements of the course you found particularly effective

(CSE 410LEC) Course was good. Interesting seminar layout.

(CSE 410LEC) The ZyBook made the course very convenient as all resources and assignments were right there. The format of the course was very hands off and we taught ourselves, I particularly liked that. It took away a lot of pressure that exams and huge projects put on a student while not compromising the quality of the course. I felt that I learned a lot and was able to enjoy the course more in this format. The ZyBook projects were stimulating and offered a lot of value as a student giving us applicable 'real world' applications for the coding we did.

Comment on course improvements you would suggest

(CSE 410LEC) Perhaps more of a focus in nodeJS & javascript, or PHP

(CSE 410LEC) None to suggest. I had no complaints of the course.
