Re: OPT for Robert L. Surowka

To whom it may concern:

This letter is written to verify that my student Robert L. Surówka is expected to complete all requirements for the PhD degree in Computer Science on May 5th 2014. It is my understanding that he is eligible to apply for work authorization and search for a position that is related to his field of study. This practical work experience will complement his studies and round out the education he has received thus far.

Yours sincerely

Dr. Kenneth W. Regan
