Ms. Donna Grant  
Admissions, Department of CSE  
University at Buffalo  
Re: applicant Haoriwa (Horvo)

Dear Graduate Admissions Committee:

I am delighted to recommend Mr. Aamel Unia for admission into the BS-MS program. I have known him since January as a student in my course, “CSE396: Intro Theory of Computation.” This includes frequent interaction during office hours and via online course media.

Mr. Unia just earned his second A on my second of two prelim exams. His homework is also currently an A which cements his standing in the course. Not only is he able to do the logical/formal manipulations and calculations, his understanding of the concepts through essay-like components of answers is first-rate.

He is also engaging in one-on-one conversation about a range of topics from philosophical to technical. This isn’t necessarily pointing to his adopting theory of computation for graduate study, but it does point to the merit of deepening his involvement with CS beyond the ambit of the B.S. degree. Thus I think he is perfectly the kind of candidate the BS-MS program was created for, and I wholeheartedly recommend it. I will be happy to answer any other questions you may have.

Yours sincerely

Dr. Kenneth W. Regan
