How to create and submit REPLs to Autolab

Getting Started

1. Sign into replit.com
2. Create a new python REPL, name it whatever you like

Editing Your Code

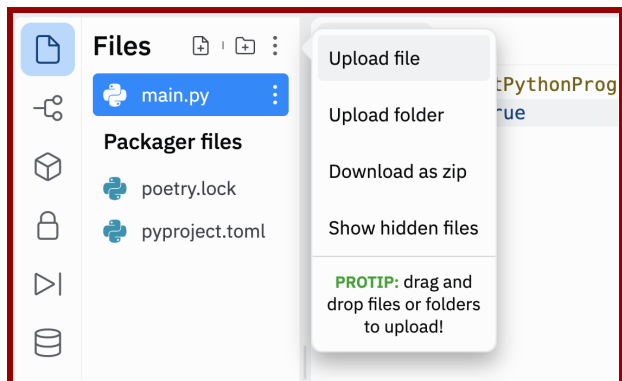

1. In main.py add the following code:

```
def myFirstPythonProgram():  
    return True
```

Submission

1. Download your REPL as a .zip file
 - a. Click the three dots to the right of “Files”
 - b. Select “Download as zip” from the available options

Note for Safari Users: You must disable the “Open “safe” files after downloading” option in Safari > Preferences > General

2. Submit your .zip file to Autolab
 - a. Navigate to the course [Autolab](#) page (linked on the course website)
 - b. Select the assignment you'd like to submit to (Practice Lab)
 - c. Follow the prompts to submit your .zip file
 - d. After a few seconds, you should see a grade. Clicking the grade will give additional feedback.
