Bad Internet Coverage

- Govt should regulate things
- Give tax incentives to companies

Figuring out input

- Figure out the specific locations with no internet coverage
↳ to put the hubs
- Find out the locations with good coverage & extend from those places

Algorithm

Objectives

- Regulating the max. speed for the new infrastructure

Output

- Install internet balloons where otherwise costs are too much
- Decentralized peer-to-peer networks
- Model the location data as a graph
- Minimize the number of hubs to be installed

Good Internet Coverage
