Re: applicant Bowen Sui

Dear Graduate Admissions Committee:

I am delighted to recommend Mr. Bowen Sui for admission into the BS-MS program. I have known him since January as a student in my course, "CSE396: Intro Theory of Computation."

Mr. Sui earned an A on my second of two "Prelim" exams after a B on the first. Not only that, he found a flaw in one of my questions during the exam, which I then noted on the board. His homeworks have also been consistently in the B+ to A range. His final exam may pull his overall course grade below A- but considering that my usual course grade average is B- this will still place him highly.

In person he has gained in enthusiasm for the course. Overall I think he is just the kind of candidate the BS-MS program was created for, and I wholeheartedly recommend it. I will be happy to answer any other questions you may have.

Yours sincerely

Dr. Kenneth W. Regan
